

# Construction Work October-November

The structural phase of construction continues, and there will still be a lot of heavy traffic to the site. The first interior works will begin during the autumn with technical installations.

There has been a change in project management on the client's side: Mikko Syrjänen will continue as project manager, replacing Pasi Kanerva.

**We kindly ask everyone to continue exercising special caution in traffic near the construction site.**

Upcoming construction work:

- Installation of elements
- Connection works
- Backfilling, drainage, and area piping
- Building systems (HVAC, electrical, etc.)
- Partition wall masonry

We apologize for any inconvenience caused by the construction.

You can follow the progress of the school construction via the QR code on the English School's website. (<https://engs.fi/new-school/>).
