

Construction Work Early 2026

The structural work of the school has progressed on schedule and will be completed during early 2026. With the installation of the roof, the school has reached its topping-out phase.

The work is increasingly moving indoors, and at this stage the number of workers on site will grow significantly. The building's final heating systems are already being used to warm the interior spaces.

Upcoming construction work:

- Building services (HVAC/electrical/plumbing)
- Partition wall construction
- Facade and roof finishing work

We apologise for any inconvenience caused by the work.

You can follow the construction progress using the QR code provided, which links to the English School's website:
